#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 02 October 2006.
- 2a) This action is FINAL.                  2b) This action is non-final.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,10,23,32,45, and 54 are rejected under 35 U.S.C. 102(b) as being anticipated by Corvi et al. (20020038097). Corvi et al. shows a biopsy device for collecting a tissue sample comprising an introducer having a working end portion which includes an introducer 12 and cutter portion 18; hollow tubular sheath 12 having proximal and distal ends 14 and 16 respectively, the introducer having a side aperture 42 or 204 (page 3, paragraph 31), a cutter assembly 18 comprising a hollow cylindrical tube (page 3 paragraph 32) with diameter sized to fit inside of introducer, introducer having cutting edge 20 and cutting tube having cutting edge 22 at distal end; the endoscope assembly 264 is situated within cutter assembly (best shown in Figure 15, paragraph 49) comprises a fiber optic bundle received within cutter tube. The cutter tube and the introducer sheath cooperate to sever the tissue sample via actuator rod 37 (page 3 paragraph 30).

***Response to Arguments***

3. Applicant's arguments filed October 2, 2006 have been fully considered but they are not persuasive.

Art Unit: 3736

4. In response to Applicant's arguments that Corvi et al. does not show an introducer and an endoscope assembly that axially extends through the cutter assembly. The Examiner disagrees. As broadly as structurally claimed, Corvi et al. shows an introducer assembly comprising a hollow sheath having a distal end portion and a proximal end portion as claimed by Applicant. Furthermore, Corvi et al. shows an endoscope assembly which is comprised of a fiber optic bundle situated in the cutter assembly as recited in claims 1 and 23 (paragraph 49 and claim 27). Therefore the Examiner believes that Corvi et al. teaches the invention claimed by Applicant. See rejection above.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
